All orders for trimmings will be rounded up to the nearest 1/2 metre. Minimum order 1m.

Key

	The Shaded areas indicate Flame Retardant Qualities, see below for specific standards
U	Suitable for General Domestic Upholstery. Flame Retardant to Cigarette & Match
U5	Suitable for contract Upholstery – tested to predictive test BS7176 for Flame Retardancy. And cigarette & Match.
UL	Suitable for Light Domestic Upholstery. Flame Retardant to Cigarette & Match
C	Suitable for Contract Curtains. Treated to BS5867 Part2B (Washable)
T	These fabrics require a 'top up' finish to be suitable for Flame Retardant CONTRACT Curtains
UBBc	Suitable for General Domestic Upholstery. If used with a barrier or back coating.
UBc	Suitable for General Domestic Upholstery. ONLY If used with a barrier or back coating or suitable flame retardant finish
UIBBc	Suitable for Light Domestic Upholstery. If used with a barrier or back coating.
UIBc	Suitable for Light Domestic Upholstery. ONLY If used with a barrier or back coating or suitable flame retardant finish

If you are in doubt about any of the Flame Retardancy Regulations please contact the sales office. These are an indication of performance based on batch testing against the recent legislation on flammability of upholstered furniture.

THEY DO NOT INDICATE THE WEAR CHARACTERISTICS OF THE CLOTH.

Washing Instructions

- 2 Machine Wash 40 degrees, Do not use Chlorine Bleach, Cool Iron, Dry Cleanable P
- 3 Do Not Wash, Do not use Chlorine Bleach, Cool Iron, Dry Cleanable P

CONDITIONS OF SALE

These conditions override any different, contrary or additional terms included or referred to in any order or other correspondence from the Purchaser. These terms and conditions are governed by English law and the parties submit to the non-exclusive jurisdiction of the English courts.

Risk and Title

All goods remain the property of Textra Ltd until full payment is received. Risk in the goods is transferred to the Purchaser immediately upon delivery and he should immediately insure the goods against loss and damage. Textra Ltd has the right to enter onto the Purchaser's premises and retrieve any such goods for which payment has not been made.

Terms

If credit facilities have previously been agreed by Textra Ltd, payment is due 30 days from date of invoice. In all other cases, payment must be made in full before the goods are despatched.

Prices

The recommended retail prices are inclusive of VAT at 17½%. **WE RESERVE THE RIGHT TO CHANGE PRICES OR WITHDRAW ITEMS FROM OUR RANGE AT ANY TIME WITHOUT NOTIFICATION.** As an added precaution, we suggest that you indicate prices as you know them on all orders, and if there is a discrepancy, notification will be sent prior to despatch.

Minimum Order

There is a minimum order of 1m on all orders for Fabric and Trimmings.

Carriage & Packing

Orders despatched to UK mainland addresses will be subject to a £9.50 plus VAT per parcel carriage and packing charge. Carriage and Packing charges for other destinations will be advised before the goods are despatched.

Trimmings: Orders of £25 or under will be sent at a reduced charge of £4.50

Invoicing

Metric measurements will be used. Lengths ordered in yards will be rounded up to the nearest metre.

Cancellation of orders

The Purchaser will be contractually bound to purchase the amounts set out in his order, on acceptance of that order by us. However, in our sole discretion, we will normally be prepared to agree a cancellation of order, provided that notice of cancellation is received by us before work has commenced or expenses incurred in the goods. If, in our sole discretion, we agree to accept a cancellation of order after expense has been incurred in connection with the goods concerned, we reserve the right to levy a charge, up to the lower of the expenses concerned or the purchase price of the goods.

Claims

Claims for non delivery of goods cannot be accepted unless notified to us within 15 days of the expected date of receipt. All fabrics must be examined carefully before cutting for flaws and verification of pattern, colour, repeat, width and measurement. **WE CANNOT ACCEPT LIABILITY ONCE THE FABRIC HAS BEEN CUT IN RESPECT OF ANY FLAW, FAILURE TO COMPLY OR NON COMPLIANCE WITH DESCRIPTION OR SAMPLE WHICH SHOULD HAVE BEEN REASONABLY APPARENT ON SUCH AN EXAMINATION.**

Incorrect Goods

The Purchaser is required to check the goods delivered for compliance with the order and to raise any claims as to a discrepancy between his order and the goods received within 15 days of receipt. This is particularly important when the goods are consigned to a location other than the Purchaser's own premises.

Colour Matching

Shade variation between batches cannot be avoided, therefore if an exact match is required a sample must accompany your order, or a stock cutting and reserve should be requested. Textra can accept no liability for goods if the incorrect colour or shade are cut or made up.

Pattern Repeats

All Pattern Repeats quoted are approximate. Customers should take this in to consideration when estimating quantities.

Returns

The acceptance of returns, otherwise than by reason of any alleged defect in the goods, is subject to our absolute discretion. Goods returned through no fault of our own will be subject to a 25% handling charge, and the Purchaser will be responsible for carriage and insurance. Goods must be returned in good and marketable condition, and in their original packaging if at all possible. **NO RETURNS CAN BE ACCEPTED ONCE THE FABRIC HAS BEEN CUT.**

Secondary Finishes

Textra Ltd. are unable to accept liability for their fabrics, if any secondary finishes are applied by a third party.

Limitation of Liability

Nothing in this clause purports to exclude or limit our liability for death or personal injury which is caused by our negligence or which is caused by the supply of any product which is defective within the meaning of the Consumer Protection Act 1987. Subject to the above, no liability is accepted for indirect or consequential loss and no liability is accepted for loss of profit, loss of business or loss of anticipated savings. Our liability for direct loss arising out of any fault or defect in the quality, the condition, description or fitness for any purpose is limited in amount to a sum not exceeding the purchase price of the goods concerned. If any of these terms or conditions or any provisions of this agreement are held to be invalid or unenforceable, then this agreement shall take effect as though that provision had been deleted from it.

Delivery Dates

Delivery dates are approximate and although every effort is made to keep to these dates, delays may occur due to circumstances beyond our control and for these we can accept no liability. Goods may be delivered in instalments and each instalment shall represent a separate contract and be payable in accordance with our terms. Failure to deliver any instalment does not give the Purchaser the right to treat the whole contract as repudiated or withhold sums already due.

IMPORTANT INFORMATION

Vat Dyes

Vat dyes are used throughout Textra's printed collection and are their choice whenever possible in the woven and dyed ranges. Textra consider them to be superior to other dyes suitable for furnishing fabrics. They penetrate the fibre of the cloth giving a natural handle and a life to the colour. Vat dyes withstand repeated washing or dry cleaning, are resistant to light fading and have a high abrasion resistance. In addition they have a lower chemical content and are therefore kinder to the environment.

Woven fabrics

Many woven fabrics can be used both sides, please ensure that your upholsterer or curtain maker is aware of which side you consider to be the face side.

Pilling

The bobbling of loose fibres on the surface of the cloth is an early wear characteristic of some upholstery qualities in certain situations. Similar to loose fibres on a new wool carpet, although unsightly, once removed there is no detrimental effect on the wear properties of the cloth. Removal by a 'de-fuzzer' is the most efficient method and returns the fabric to its original appearance.

Pyrovatex Finish

Pyrovatex is a permanent durable flame retardant finish. Dirt or grease may affect the wear and flame retardant properties of furnishing fabric, therefore we recommend regular cleaning. If a dry cleaning process is indicated, please use a specialist dry cleaning company.

Shrinkage

The possibility of shrinkage should always be taken into account. An allowance of 5% is recommended. Should this occur, much of the shrinkage can be retrieved, by pulling out and pressing while the curtains or covers are still damp. Tumble-drying is not recommended.

Movement of curtains whilst hanging

Changes in atmosphere within a room, especially damp conditions, can have an effect on certain fabrics causing differential movement in both length and width. This should be taken in to account whilst making and it is recommended that generous allowances be made in case lengthening is necessary. We have no control over such conditions and therefore the cost of alterations, remain the responsibility of the customer.

Pattern variation across the width

Curtain fabric should be cut to pattern. Although every attempt is made to avoid distortion during the printing process it does occur, and is highlighted in multiple width curtains. Pattern should be checked prior to cutting and adequate allowances made. Fabrics cut and sewn to pattern will hang straight.

Optical Brighteners

We recommend that you avoid the use of washing powders or liquids containing these substances as they may affect the shade of coloured textiles.
